Teacher Training

Undo X

Guna, the Head of the Parikma Centre for Learning, Koramangala, was sent for exposure and training to Mulberry Bush UK, with whom we have an agreement to do sharing of learning and teacher exchanges. Mulberry Bush is a unique and special school for children traumatized by various reasons, such as drop-out of school due to severe behaviour issues, family issues, and violent behaviour, with no proper care in the families. It undertakes a huge responsibility to mould children of ages six to thirteen. Guna says there was a lot to learn from them. She will now share those best practices with the rest of the teachers in Parikma. This initiative is part of the Teacher Development program that Parikma has invested in.

New Chapter

"What a beautiful day! Here I am with one of my senior students, Victor, who leaves for the UK on the 7th of April. He has been offered a job at Cambridge University, Addenbrook Hospital, as a genetics researcher. He has always been very focused and steady, just as we would like all the children of Parikma to be. I have tried to guide him the best way I can with my love and time. I know he will do well in Cambridge and keep the Parikma flag flying. He wants to work and also do his PhD in genetics. Let's give him all our blessings because he will need them in this new journey." – Founder, Dr Shukla Bose

Alumni #2

Naveen is studying MBA at the Nagarjuna Degree College and teaches taekwondo in the evenings to continue with the sport and earn some money. It is great to see confident young individuals carving out their future purposefully. It is lovely that they keep in touch with their school and teachers.

Award

Founder Dr Shukla Bose received the Mahila Spandan Award 2025 from the Alliance Centre of Women Empowerment for "outstanding and exemplary contributions towards Social Impact".

Collaborations: Dubai

We are thrilled to have students from GEMS Modern Academy, Dubai, back with us. Our students look forward to a week full of learning, exchanging ideas, and, yes, possible new projects.

Our #bestpractices

Most school visitors express their fascination and surprise about our children's evident love and interest in the environment – always a topic of discussion during feedback sessions. We are not surprised. Over the years, our children have volunteered and actively participated in several awareness drives—cleaning and plastic removal campaigns are regulars. One activity they are always excited about!
