CRISIL VO 1A

RATING

Parikrma Humanity Foundation
receives the CRISIL Voluntary
Organisation (VO) grading of VO
1A, indicating "Very Strong
Delivery Capability and High
Financial Proficiency".

We are thrilled to inform you that we have received the CRISIL Voluntary Organisation (VO) grading of VO 1A, indicating "Very Strong Delivery Capability and High Financial Proficiency".

The rating signifies a strong capacity to deliver on our mission and indicates a strong leadership team that is visionary and strategic in its planning for both the present and the future.

OUR KEY STORIES, ACHIEVEMENTS, NOTICES, THANK YOU'S, AND MORE!

Alumni News

“I am so fortunate to be able to share such news of transformation all the time. Here are our students of the 2016 batch, Gayathri and Chiranjeevi, who will be getting married this month. They have been childhood sweethearts since their school days. Today, they have found their own careers. Chiranjeevi was always interested in football and is teaching physical education in one of the government schools Parikrma has adopted. He is helping children excel in taluk sports. Gayathri is working in the HR department in the Learning and Development space at IBM. They say that together they carry forward the values of gratitude and simplicity that they have learnt in Parikrma. Let's wish this lovely young couple the very best for a happy future with purpose. They will be the inspiration for the generations to come. That is the Parikrma legacy.” - Shukla Bose

Beyond the textbook

Our students, Dheeraj and Sushma participated in the Young Indians Parliament in Hyderabad. We are thrilled that our students will be exposed the functioning of a democratic system while also developing leadership, public speaking, and decision-making skills.

The hands-on workshop conducted by NCBS (National Centre for Biological Sciences) was a fascinating dive into the intricate interactions between plants and microbes. It not only introduced our students to these crucial relationships but also highlighted their significance in ecosystems and agriculture.

Parikrma Oxygen

When ideas, love for nature, and a single focus on inspiring children to flourish in mutuality, respect, and reciprocity with nature come together, it shows! We are so thrilled with the way this work of love and labour is coming together... The butterfly you see is the lake that we have created at Oxygen, a significant part of our nature-inspired project. This lake serves as a habitat for various species, providing a unique learning environment for the children we aim to inspire.

This month, we also held our very first camp-out programme at Oxygen, with all the Heads of School. From walking the length and breadth of the land to discovering and observing all kinds of critters and insects, to holding engaging, interactive sessions, the day ended with the sky putting on a fantastic show in colours, and finally being lit by stars, as our staff camped out in the open.

Watch now!

The podcast series S.T.R.E.E. by IndiaAssetz features founder Dr Shukla Bose in its latest episode. Bose talks about why she chose to leave the boardroom and dedicate her life to educating underprivileged children. Watch [here](#)

Giving time over things is what leads to the progress of humanity. This was my experience volunteering as a teacher at [Parikrma Humanity Foundation](#). I volunteered here as a teacher for 5th, 6th and 7th graders. The time I spent with the faculty and with the kids made me feel like I was part of their small family. From helping kids read books to having a little fun playing makeshift cricket with a crumpled-up piece of paper and an exam board as a bat, it took me back to my childhood. It truly takes time, effort, and an undeniable amount of patience to be a teacher, but a greater struggle to let go of the kids you've spent day and night with, helping them grow. At Parikrama, the kids are family, never strangers, with smiles when they see someone new and hugs when you finally become a part of their family. Having taught the kids mathematics, science, English and Hindi, I've learnt a great deal myself. The art of patience and a little mix of fun storytelling is the way to any kid's heart and ears, if you may.

Finally, I want to show a great deal of appreciation and gratefulness to Mrs. Sheela George, the volunteer coordinator, who, with utmost kindness, helped me get settled in and showed me the reins of teaching and to [Shreeranjini GN](#), the principal at Parikrama, for giving me this wonderful opportunity. These children now hold a special place in my heart, and I look forward to continuing as a volunteer, giving my time to a cause that has given me so much in return. I thank you, [Parikrma Humanity Foundation](#), for this life-changing experience.
